## CERTIFICATE

The project report entitled "**VIT CAR RENTAL WEBSITE**" is prepared and submitted by**Harsh Gupta, Shubham Gupta,Arushi Anand and Uday Singh Shergill (Register No: 20BCE1310** , **20BCE1637,20BCE1644 and 20BCE1806)**. It has been found satisfactory in terms of scope, quality and presentation as partial fulfilment of the requirements for the award of the degree of **Bachelor of Technology – Computer Science and Engineering** in Vellore Institute of Technology, Chennai, India.

**Examined by**: Prof. Rajiv

# ACKNOWLEDGEMENT

It is our privilege to express our sincerest regards to our faulty-in-charge, **Prof. Rajiv**, for his valuable inputs, able guidance, encouragement, whole-hearted cooperation and constructive criticism throughout the duration of our project.

We pay our respects and love to our parents and all other family members and friends for their support and encouragement throughout our career. Last but not the least we express our thanksto our friends for their cooperation and support.

# ABSTRACT

This Car Rental System project is designed to aid the car rental company to enable renting of cars through an online system. It helps the users to search for available cars view profile and book the cars for the time period. It has a user-friendly interface which helps the user to check for cars and rent them for the period specified. They could also make payment online. The rental cars shall be categorized into economy, premium etc. Based on the type of car required by the customer, the user shall be able to make bookings. The use of internet technology has made it easy for the customers to rent a car any time. This Car Rental System makes the bookings easy. It saves time and labor. The tool shall ask the user for information such as the date and time of journey, type of car etc. Also, it will need an identification number. Using these details, the tool shall help the customer to book a car for the journey.

# INTRODUCTION

This project is designed so as to be used by Car Rental Company specializing in renting cars to customers. It is an online system through which customers can view available cars, register, view profile and book car. A car rental is a vehicle that can be used temporarily for a fee during a specified period. Getting a rental car helps people get around despite the fact they do not have access to their own personal vehicle or don't own a vehicle at all. The individual who needs a car must contact a rental car company and contract out for a vehicle. This system increases customer retention and simplify vehicle and staff management.

© 2022 VIT Car Rental

# CONCLUSION & FUTURE WORK

The mission of our project was to provide a website for VIT students to rent a car at affordable rates and convenient places. For Future work we might add some modules to track the cars and get the approximate value of distance that car has travelled to decrease some malpractices that may happen.
